## **DETAILED ACTION**

### ***Claim Objections***

1. **Claim 2** is objected to because of the following informalities:

In page 6, line 12, change "memory" to --memory; and--

In page 6, line 13, delete "A diagnostic system as recited in claim 1".

Appropriate correction is required.

**Claim 4** is objected to because of the following informalities:

In page 6, line 16, change "A diagnostic system as recited in claim 4" to -- A diagnostic system as recited in claim 3--.

Appropriate correction is required.

**Claim 5** is objected to because of the following informalities:

Claim 5 recites the limitation "said network" in page 6, line 19. There is insufficient antecedent basis for this limitation in the claim.

Appropriate correction is required.

**Claim 17** is objected to because of the following informalities:

In page 8, line 2, change "A diagnostic system as recited in claim 17" to --and--.

Appropriate correction is required.

### ***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

**Claim 4** is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 4 is considered to be indefinite because it depend on it self.

For the purpose of examination, Examiner considers that claim 4 depends on claim 3.

**Claims 8, 9 and 11-15** are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is unclear what claim 8 recites and weather claim 8 is and independent claim or a dependent claim.

**Claim 10** is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 10 is considered to be indefinite because it depend on it self.

**Claims 17 and 18** are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 17 is considered to be indefinite because it depend on it self.

For the purpose of examination, Examiner considers that claim 17 depends on claim 16.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

**Claims 1-7 and 16** are rejected under 35 U.S.C. 102(e) as being anticipated by Schleiss et al. (U.S. 6,298,454)

**As per claims 1, 7 and 16**, Schleiss et al. teach a computer controller coupled to the data acquisition system (see col. 3, lines 15-29); a display device coupled to the computer controller (see col. 4, lines 40-56); the controller receiving data from the data acquisition system, diagnosing a problem in response to the data (see col. 6, line 51 to col. 7, line 9), the controller generating a screen display corresponding to an architectural representation of the data acquisition system (see col. 3, lines 40-51), the controller generating a screen indicia on the display device corresponding to a location of a problem on the schematic representation of the data acquisition system (see col. 3, lines 50-64).

**As per claim 2**, Schleiss et al. further teach that data is stored in a memory (see col. 6, lines 51-58); and wherein the data is communicated from the data acquisition system (see col. 6, lines 51-58 and Fig. 2).

**As per claims 3-5**, Schleiss et al. further teach a network coupling the computer controller and the data acquisition system (se col. 6, line 62 to col. 7, line 9).

As per claim 6, Schleiss et al. further teach that the controller has a web browser, the controller generating the screen indicia through the web browser (see col. 16, lines 4-28).

#### **Prior art**

4. The prior art made record and not relied upon is considered pertinent to applicant's disclosure:

**Price et al. ['674]** disclose radiography device with flat panel X-Ray source.

**Kelly et al. ['862]** disclose web-based medical diagnostic system financial operation planning system and method.

**Eryurek et al. ['864]** disclose remote analysis of process control plant data.
